Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Detailed Action

1. In the specification, page 5, line 8, "removably 309" should be --309 removably--.
2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 5, 6, 7 and 13-18 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Zimmerman.

Note 42 in Zimmerman is a front axle housing. Note 42 is also used in Zimmerman to denote a lever.

Regarding claim 7, note 48 engages 72 and is thus broadly a hook.

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to

Art Unit: 3652

consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

6. Claims 2, 3 and 4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Zimmerman in view of Schmitz, Jr. et al.

It would have been obvious to one having ordinary skill in the art to provide a boom lock on the Zimmerman cylinder 24 in view of the teaching in Schmitz to provide direct protection to the hydraulic cylinder. Note 68 in Schmitz is synonymous with applicants' collar.

7. Claims 8-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Zimmerman.

The Zimmerman device fails to meet the instant claims since its restraint appears to be permanently attached to the axle and moved from a none use to a use position when needed instead of being attached each time. However, it would have been obvious to one having ordinary skill in the art to attach and to remove the restraint in Zimmerman everytime one secured and unsecured the restraint to protect against thief of the restraint and/or weather and field damage to the restraint when not in use.
